G.P.A 4.0

Amanda Krummel

Developer | IT

Understanding my clients and ensuring that their needs are met is my objective through everything I do. In this, I must stay up-to-date with industry standards and explore new cutting edge technologies. Being able to communicate with my clients and knowing the right questions to ask is integral in creating applications and websites that fulfill their needs or simply setting up workstations in ways that will aid in their ability to be more productive in their own work. Knowing my work is helping others complete their own more effectively gives me great satisfaction.

PROFESSIONAL WORK
